Summary

Full-Stack Developer with 4+ years of experience in frontend and backend development. Skilled in React, TypeScript, Node.js, PostgreSQL, microservices, and cloud-based deployments. Focused on building scalable, reliable, and high-performance applications.

Conference Talks

Intro to Webpack and Web Tooling: Reactify Bangalore

Experience

SDE 2, Fountane

08/2023 – Present

Current Project

- Delivered end-to-end full-stack features across frontend and backend systems, including architecture design, database modeling, third-party integrations, and deployment workflows across development and UAT environments.
- Developed responsive frontend applications using React, Tailwind CSS, and React Query, focusing on performance, scalability, and user experience.
- Designed and implemented background processing systems using Redis and BullMQ for scalable asynchronous task execution and workflow automation.
- Designed and developed backend services within a microservices architecture using Node.js (NestJS), including database schema design, API development, and system integrations.
- Built and maintained CI/CD pipelines, streamlining deployments and improving development velocity.
- Owned the end-to-end Twilio integration, including account setup, SMS workflows, and live chat implementation.
- Contributed to the implementation and maintenance of a self-hosted observability stack using Grafana, Prometheus, Loki, and Fluent Bit for centralized monitoring, alerting and log aggregation.

Last Project

- Developed core frontend features for StayNow, a travel booking and trip-planning platform.
- Worked with Redux Toolkit for client-side state, RTK Query with GraphQL Codegen for type-safe client API hooks.
- Independently designed and built the hotel staff admin panel, enabling operational management workflows and streamlining day-to-day hotel operations.
- Contributed to backend development within a microservices architecture.

SDE 1, Invact

01/2022 – 06/2023

- First engineering hire at Invact, building the MVP and core platform features from the ground up, contributing to the company's \$5M seed funding round led by Arkam Ventures.
- Funding announcement: Economic Times Article
- Developed full-stack product features across frontend, backend, and database layers using React, Node.js, NestJS, Supabase, and PostgreSQL.
- Developed event scheduling and notification systems delivering automated SMS, WhatsApp, and email communications to thousands of users daily using Twilio and Amazon SES.

Skills

Cloud Services: AWS.

Database: Postgress, MongoDB.

FrontEnd: React, Nextjs, Typescript, Tailwind, Storybook.

BackEnd: Nodejs, Nestjs, Microservices , Redis , Docker , BullMQ , Keycloak, Kong, Kafka.

Education

Mumbai University, BE in Computer Engineering

Aug 2018 – June 2022

- GPA: 8.6/10
